

The TMC Index

Intelligent Hotel Sourcing through Adaptive, Data-Driven Technology

The **TMC Index** powered by **BTP Automation** delivers real-time customer hotel spend performance visibility and pro-active automation, driving compliance and negotiations which lead to a **successful corporate hotel program**.

Our Mission is To Make Hotel Sourcing Easier for Everyone
Join us on our journey to Change the Way we Work.

The Benefits.

Through our partnership with all GDS systems, we can collect and clean pre and post trip data to drive corrective actions. We monitor your customer hotel spend all day, every day.

An easy-to-use global platform with 24/7 monitoring and an instant index score. Onboarding new customers to the TMC Index takes only a few steps on your part; BTP handles the rest.

Automatically and dynamically renegotiate program terms and conditions throughout each of your customers hotel program lifecycle. No more emails and spreadsheets.

Powerful proprietary predictive analytics and machine learning that applies Intelligent Sourcing and fine-tunes your customers hotel program without human intervention. Your teams can spend more time taking care of travelers.

Through our partnership with Thrust Carbon, we have developed the first-ever, automated hotel sourcing technology that allows corporate travel buyers to procure their preferred hotels based on key sustainability and duty of care factors.

Your customers will see an average 10% savings on their hotel spend. Your TMC will see instant operational efficiencies and endless kudos and high-fives.
